

MongoDB Atlas for Government Achieves FedRAMP® Moderate Authorization

February 8, 2023

Innovative cloud service helps U.S. government agencies build modern applications faster and more securely

NEW YORK, Feb. 8, 2023 /PRNewswire/ -- MongoDB, Inc. (NASDAQ: MDB), today announced that it has achieved the formal FedRAMP® Moderate Authorized designation for MongoDB Atlas for Government. MongoDB Atlas for Government provides the software tools and services necessary for U.S. government organizations to quickly and easily build and deploy secure, highly-scalable, distributed applications in the cloud. In addition, an independent auditor has attested that MongoDB Atlas for Government aligns with Criminal Justice Information Services (CJIS) requirements.

FedRAMP is a U.S. government program that provides a standardized approach to security assessment, authorization, and continuous monitoring for cloud products and services. Generally available since June 2021, MongoDB Atlas for Government is a dedicated environment for federal, state, and local agencies as well as educational institutions to build modern, cloud-native applications faster while meeting some of the most demanding data security and privacy standards.

"Security is our priority at MongoDB and a top priority for our customers. We know that with the proliferation of different types of data that is transmitted and stored in the cloud, protecting sensitive data is increasingly important for both private and public entities," said Sahir Azam, Chief Product Officer of MongoDB. "The FedRAMP Moderate designation, as well as the assessment of MongoDB Atlas for Government in support of customers with CJIS requirements, are the result of our efforts to ensure that MongoDB Atlas for Government is well positioned to secure the country's most crucial data sets and power the most innovative applications designed to transform government. Now the more than 7,500 government organizations leveraging AWS also have access to MongoDB Atlas for Government to create modern applications. We are grateful for the support and partnership of the Department of Health and Human Services (HHS) who sponsored MongoDB throughout the authorization process."

With MongoDB Atlas for Government, customers can deploy MongoDB clusters on Amazon Web Services (AWS) U.S. East and West Regions or AWS GovCloud to use the full functionality of MongoDB's document database, Atlas Search, fully automated backup, and more. Atlas for Government also includes extensive security controls such as network isolation, role-based access controls, always on encryption in-transit, and at-rest, at no extra cost.

MongoDB received FedRAMP authorization after demonstrating adherence to stringent performance, security, and compliance standards. With this designation, MongoDB joins an elite list of FedRAMP authorized companies who are approved to provide cloud software to government organizations, giving them the confidence to innovate and scale faster.

"Together, AWS and MongoDB serve customers across a variety of industries who are transforming their operations using the power of cloud," said Jeff Kratz, General Manager, Worldwide Public Sector Partners at AWS. "Now, with MongoDB Atlas for Government's FedRAMP Moderate authorization, MongoDB can offer U.S. government organizations a rich application developer experience that enables them to build modern applications faster, all powered by AWS. We are looking forward to continuing to work with MongoDB to help our joint customers succeed in their missions."

About MongoDB

MongoDB is the developer data platform company empowering innovators to create, transform, and disrupt industries by unleashing the power of software and data. Headquartered in New York, MongoDB has more than 39,100 customers in over 100 countries. The MongoDB database platform has been downloaded over 325 million times and there have been more than 1.5 million registrations for MongoDB University courses.

Forward-Looking Statements

This press release includes certain "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, or the Securities Act, and Section 21E of the Securities Exchange Act of 1934, as amended, including statements concerning MongoDB's FedRAMP Moderate Authorized designation. These forward-looking statements include, but are not limited to, plans, objectives, expectations and intentions and other statements contained in this press release that are not historical facts and statements identified by words such as "anticipate," "believe," "continue," "could," "estimate," "expect," "intend," "may," "plan," "project," "will," "would" or the negative or plural of these words or similar expressions or variations. These forward-looking statements reflect our current views about our plans, intentions, expectations, strategies and prospects, which are based on the information currently available to us and on assumptions we have made. Although we believe that our plans, intentions, expectations, strategies and prospects as reflected in or suggested by those forward-looking statements are reasonable, we can give no assurance that the plans, intentions, expectations or strategies will be attained or achieved. Furthermore, actual results may differ materially from those described in the

forward-looking statements and are subject to a variety of assumptions, uncertainties, risks and factors that are beyond our control including, without limitation: the impact the COVID-19 pandemic may have on our business; the financial impacts of the COVID-19 pandemic on our customers and our potential customers; the effects of the ongoing military conflict between Russia and Ukraine on our business and future operating results; economic downturns and/or the effects of rising interest rates, inflation and volatility in the global economy and financial markets on our business and future operating results; our potential failure to meet publicly announced guidance or other expectations about our business and future operating results; our limited operating history; our history of losses; failure of our database platform to satisfy customer demands; the effects of increased competition; our investments in new products and our ability to introduce new features, services or enhancements; our ability to effectively expand our sales and marketing organization; our ability to continue to build and maintain credibility with the developer community; our ability to add new customers or increase sales to our existing customers; our ability to maintain, protect, enforce and enhance our intellectual property; the growth and expansion of the market for database products and our ability to penetrate that market; our ability to integrate acquired businesses and technologies successfully or achieve the expected benefits of such acquisitions; our ability to maintain the security of our software and adequately address privacy concerns; our ability to manage our growth effectively and successfully recruit and retain additional highly-qualified personnel; and the price volatility of our common stock. These and other risks and uncertainties are more fully described in our filings with the Securities and Exchange Commission ("SEC"), including under the caption "Risk Factors" in our Quarterly Report on Form 10-Q for the quarter ended October 31, 2022, filed with the SEC on December 8, 2022 and other filings and reports that we may file from time to time with the SEC. Except as required by law, we undertake no duty or obligation to update any forward-looking statements contained in this release as a result of new information, future events, changes in expectations or otherwise.
