Title: President and Chief Executive Officer

MongoDB, Inc. Announces Second Quarter Fiscal 2025 Financial Results

Second Quarter Fiscal 2025 Total Revenue of \$478.1 million, up 13% Year-over-Year

Continued Strong Customer Growth with Over 50,700 Customers as of July 31, 2024

MongoDB Atlas Revenue up 27% Year-over-Year; 71% of Total Q2 Revenue

NEW YORK - August 29, 2024 - MongoDB, Inc. (NASDAQ: MDB) today announced its financial results for the second quarter ended July 31, 2024.

“MongoDB delivered healthy second quarter results, highlighted by strong new workload acquisition and better-than-expected Atlas consumption trends. Our continued success in winning new workloads demonstrates the critical role MongoDB’s platform plays in modern application development,” said Dev Ittycheria, President and Chief Executive Officer of MongoDB.

“We remain excited about our opportunity to continue capturing share in one of the largest markets in software. Today, companies of all sizes and across nearly every industry and geography rely on MongoDB to build the software that helps them run and transform their business. We believe we are incredibly well positioned to help customers incorporate generative AI into their business and modernize their legacy application estate.”

Second Quarter Fiscal 2025 Financial Highlights

- **Revenue:** Total revenue was \$478.1 million for the second quarter of fiscal 2025, an increase of 13% year-over-year. Subscription revenue was \$463.8 million, an increase of 13% year-over-year, and services revenue was \$14.3 million, a decrease of 1% year-over-year.
- **Gross Profit:** Gross profit was \$349.9 million for the second quarter of fiscal 2025, representing a 73% gross margin compared to 75% in the year-ago period. Non-GAAP gross profit was \$360.8 million, representing a 75% non-GAAP gross margin, compared to a non-GAAP gross margin of 78% in the year-ago period.
- **Loss from Operations:** Loss from operations was \$71.4 million for the second quarter of fiscal 2025, compared to a loss from operations of \$49.0 million in the year-ago period. Non-GAAP income from operations was \$52.5 million, compared to non-GAAP income from operations of \$79.1 million in the year-ago period.
- **Net Loss:** Net loss was \$54.5 million, or \$0.74 per share, based on 73.5 million weighted-average shares outstanding, for the second quarter of fiscal 2025. This compares to a net loss of \$37.6 million, or \$0.53 per share, in the year-ago period. Non-GAAP net income was \$59.0 million, or \$0.70 per share, based on 83.8 million diluted weighted-average shares outstanding. This compares to a non-GAAP net income of \$76.7 million, or \$0.93 per share, in the year-ago period.
- **Cash Flow:** As of July 31, 2024, MongoDB had \$2.3 billion in cash, cash equivalents, short-term investments and restricted cash. During the three months ended July 31, 2024, MongoDB used \$1.4 million of cash in operations, used \$1.1 million of cash in capital expenditures and used \$1.5 million of cash in principal repayments of finance leases, leading to negative free cash flow of \$4.0 million, compared to negative free cash flow of \$27.3 million in the year-ago period.

A reconciliation of each non-GAAP measure to the most directly comparable GAAP measure has been provided in the financial statement tables included at the end of this press release. An explanation of these measures is also included below under the heading “Non-GAAP Financial Measures.”

Second Quarter Fiscal 2025 and Recent Business Highlights

- The MongoDB AI Applications Program (MAAP) was made generally available to customers in July. MAAP brings together an ecosystem of companies—including tech leaders like AWS, Google Cloud, Microsoft Azure and Accenture as well as gen AI innovators like Anthropic, Cohere and Fireworks AI—to offer an end-to-end AI technology stack, professional services, and a unified support system that helps customers quickly build and deploy AI applications. Organizations are eager to adopt AI, and MAAP makes it easier for them to confidently move from concept to production.
- MongoDB Atlas Vector Search was named the most loved and second-most used vector database on the market for the second year in a row in Retool’s 2024 State of AI report. Since introducing Atlas Vector Search last year, MongoDB has quickly become a trusted partner for customers looking to build powerful AI applications.
- MongoDB continues to be a critical partner to hyperscalers around the world. Most recently, MongoDB was named Amazon Web Services’s (AWS) Technology Partner of the Year in Taiwan, AWS’s Global Software Partner of the Year in ASEAN, and Microsoft’s Global ISV Partner of the Year in Spain. With availability in 118 AWS, Google Cloud, and Microsoft Azure cloud regions globally, AI-focused technology integrations with all three major cloud providers, and a growing presence in the major cloud marketplaces, developers can frictionlessly run MongoDB Atlas-backed applications anywhere.

Third Quarter and Full Year Fiscal 2025 Guidance

Based on information available to management as of today, August 29, 2024, MongoDB is issuing the following financial guidance for the third quarter and full year fiscal 2025.

	Third Quarter Fiscal 2025	Full Year Fiscal 2025
Revenue	\$493.0 million to \$497.0 million	\$1.92 billion to \$1.93 billion
Non-GAAP Income from Operations	\$57.0 million to \$60.0 million	\$187.0 million to \$195.0 million
Non-GAAP Net Income per Share	\$0.65 to \$0.68	\$2.33 to \$2.47

Reconciliations of non-GAAP income from operations and non-GAAP net income per share guidance to the most directly comparable GAAP measures are not available without unreasonable efforts on a forward-looking basis due to the high variability, complexity and low visibility with respect to the charges excluded from these non-GAAP measures; in particular, the measures and effects of stock-based compensation expense specific to equity compensation awards that are directly impacted by unpredictable fluctuations in MongoDB’s stock price. MongoDB expects the variability of the above charges to have a significant, and potentially unpredictable, impact on its future GAAP financial results.

Conference Call Information

MongoDB will host a conference call today, August 29, 2024, at 5:00 p.m. (Eastern Time) to discuss its financial results and business outlook. A live webcast of the call will be available on the “Investor Relations” page of MongoDB’s website at <https://investors.mongodb.com>. To access the call by phone, please go to this link (registration link), and you will be provided with dial in details. To avoid delays, we encourage participants to dial into the conference call fifteen minutes ahead of the scheduled start time. A replay of the webcast will also be available for a limited time at <http://investors.mongodb.com>.

Forward-Looking Statements

This press release includes certain “forward-looking statements” within the meaning of Section 27A of the

Securities Act of 1933, as amended, or the Securities Act, and Section 21E of the Securities Exchange Act of 1934, as amended, including statements concerning MongoDB's financial guidance for the third fiscal quarter and full year fiscal 2025 and underlying assumptions, our ability to capitalize on our market opportunity and deliver strong growth for the foreseeable future as well as the criticality of MongoDB to artificial intelligence application development. These forward-looking statements include, but are not limited to, plans, objectives, expectations and intentions and other statements contained in this press release that are not historical facts and statements identified by words such as "anticipate," "believe," "continue," "could," "estimate," "expect," "intend," "may," "plan," "project," "will," "would" or the negative or plural of these words or similar expressions or variations. These forward-looking statements reflect our current views about our plans, intentions, expectations, strategies and prospects, which are based on the information currently available to us and on assumptions we have made. Although we believe that our plans, intentions, expectations, strategies and prospects as reflected in or suggested by those forward-looking statements are reasonable, we can give no assurance that the plans, intentions, expectations or strategies will be attained or achieved. Furthermore, actual results may differ materially from those described in the forward-looking statements and are subject to a variety of assumptions, uncertainties, risks and factors that are beyond our control including, without limitation: our customers renewing their subscriptions with us and expanding their usage of software and related services; the effects of the ongoing military conflicts between Russia and Ukraine and Israel and Hamas on our business and future operating results; economic downturns and/or the effects of rising interest rates, inflation and volatility in the global economy and financial markets on our business and future operating results; our potential failure to meet publicly announced guidance or other expectations about our business and future operating results; our limited operating history; our history of losses; failure of our platform to satisfy customer demands; the effects of increased competition; our investments in new products and our ability to introduce new features, services or enhancements; our ability to effectively expand our sales and marketing organization; our ability to continue to build and maintain credibility with the developer community; our ability to add new customers or increase sales to our existing customers; our ability to maintain, protect, enforce and enhance our intellectual property; the effects of social, ethical and regulatory issues relating to the use of new and evolving technologies, such as artificial intelligence, in our offerings or partnerships; the growth and expansion of the market for database products and our ability to penetrate that market; our ability to integrate acquired businesses and technologies successfully or achieve the expected benefits of such acquisitions; our ability to maintain the security of our software and adequately address privacy concerns; our ability to manage our growth effectively and successfully recruit and retain additional highly-qualified personnel; and the price volatility of our common stock. These and other risks and uncertainties are more fully described in our filings with the Securities and Exchange Commission ("SEC"), including under the caption "Risk Factors" in our Quarterly Report on Form 10-Q for the quarter ended April 30, 2024, filed with the SEC on May 31, 2024. Additional information will be made available in our Quarterly Report on Form 10-Q for the quarter ended July 31, 2024, and other filings and reports that we may file from time to time with the SEC. Except as required by law, we undertake no duty or obligation to update any forward-looking statements contained in this release as a result of new information, future events, changes in expectations or otherwise.

Non-GAAP Financial Measures

This press release includes the following financial measures defined as non-GAAP financial measures by the SEC: non-GAAP gross profit, non-GAAP gross margin, non-GAAP operating expenses, non-GAAP income from operations, non-GAAP operating margin, non-GAAP net income, non-GAAP net income per share and free cash flow. Non-GAAP gross profit and non-GAAP gross margin exclude expenses associated with stock-based compensation. Non-GAAP operating expenses, non-GAAP income from operations, non-GAAP operating margin, non-GAAP net income and non-GAAP net income per share exclude:

- expenses associated with stock-based compensation including employer payroll taxes upon the vesting and exercising of stock-based awards and expenses related to stock appreciation rights previously issued to our employees in China;
- amortization of intangible assets for the acquired technology and acquired customer relationships associated with prior acquisitions; and
- in the case of non-GAAP net income and non-GAAP net income per share, amortization of the debt issuance costs associated with our convertible senior notes and gains or losses on our financial instruments;

- additionally, non-GAAP net income and non-GAAP net income per share are adjusted for an assumed provision for income taxes based on an estimated long-term non-GAAP tax rate. The non-GAAP tax rate was calculated utilizing a three-year financial projection that excludes the direct impact of the GAAP to non-GAAP adjustments and considers other factors such as operating structure and existing tax positions in various jurisdictions. We intend to periodically reevaluate the projected long-term tax rate, as necessary, for significant events and our ongoing analysis of relevant tax law changes.

MongoDB uses these non-GAAP financial measures internally in analyzing its financial results and believes they are useful to investors, as a supplement to GAAP measures, in evaluating MongoDB's ongoing operational performance. MongoDB believes that the use of these non-GAAP financial measures provides an additional tool for investors to use in evaluating ongoing operating results and trends and in comparing its financial results with other companies in MongoDB's industry, many of which may present similar non-GAAP financial measures to investors.

Free cash flow represents net cash from/used in operating activities, less capital expenditures, principal repayments of finance lease liabilities and capitalized software development costs, if any. MongoDB uses free cash flow to understand and evaluate its liquidity and to generate future operating plans. The exclusion of capital expenditures, principal repayments of finance lease liabilities and amounts capitalized for software development facilitates comparisons of MongoDB's liquidity on a period-to-period basis and excludes items that it does not consider to be indicative of its liquidity. MongoDB believes that free cash flow is a measure of liquidity that provides useful information to investors in understanding and evaluating the strength of its liquidity and future ability to generate cash that can be used for strategic opportunities or investing in its business in the same manner as MongoDB's management and board of directors.

Non-GAAP financial measures have limitations as an analytical tool and should not be considered in isolation from, or as a substitute for, financial information prepared in accordance with GAAP. In particular, other companies may report non-GAAP gross profit, non-GAAP gross margin, non-GAAP operating expenses, non-GAAP income from operations, non-GAAP net income, non-GAAP net income per share, free cash flow or similarly titled measures but calculate them differently, which reduces their usefulness as comparative measures. Investors are encouraged to review the reconciliation of these non-GAAP financial measures to their most directly comparable GAAP financial measures, as presented below. This earnings press release and any future releases containing such non-GAAP reconciliations can also be found on the Investor Relations page of MongoDB's website at <https://investors.mongodb.com>.

* Non-GAAP financial information is adjusted for an assumed provision for income taxes based on our long-term projected tax rate of 20%. Due to the differences in the tax treatment of items excluded from non-GAAP earnings, our estimated tax rate on non-GAAP income may differ from our GAAP tax rate and from our actual tax liabilities.

** Diluted non-GAAP net income per share is calculated based upon 83.8 million and 83.5 million of diluted weighted-average shares of outstanding common stock for the three and six months ended July 31, 2024, respectively, and 82.5 million and 82.1 million of diluted weighted-average shares of outstanding common stock for the three and six months ended July 31, 2023, respectively.

(a) Our definition of “customer” excludes users of our free offerings and all affiliated entities are counted as a single customer.

(b) Direct Sales Customers are customers that were sold through our direct sales force and channel partners.

(c) Represents the number of customers with \$100,000 or greater in annualized recurring revenue (“ARR”) and annualized monthly recurring revenue (“MRR”). ARR includes the revenue we expect to receive from our customers over the following 12 months based on contractual commitments and, in the case of Direct Sales Customers of MongoDB Atlas, by annualizing the prior 90 days of their actual consumption of MongoDB Atlas, assuming no increases or reductions in their subscriptions or usage. For all other customers of our self-serve products, we calculate annualized MRR by annualizing the prior 30 days of their actual consumption of such products, assuming no increases or reductions in usage. ARR and annualized MRR exclude professional services.
